Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 April 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Regarding claims 5-7 and 26, after a careful examination of claims 1-7 the Examiner has found that the above claims read on a non-elected species (Species II, referring to Figs. 4 and 5, see first office action). The election was made without traverse, as shown in paper # 8. for the above reasons, claims 5-7 and 26 are withdrawn from consideration.

This application contains claims drawn to an invention nonelected without traverse in Paper No. 8. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carpentier et al US Patent 4,865,600.

Carpentier et al discloses a heart valve and a valve holder. The heart valve have an inflow end, an outflow end, a flow axis, an annular suture ring, a plurality of axially-extending commissure posts and a plurality of commissure. The holder has a plurality of flexible material that have been tensioned across the outflow end of the valve, each length of material has a first segment extending directly between adjacent commissure posts (see col. 5, lines 55-68 and col.

Art Unit: 3738

1, lines 1-4; Figs. 2 & 3). However, Carpentier et al does not disclose segments crossing over just radially inward from the commissure post therebetween.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to cross over the sutures just radially inward from the commissure post therebetween because the Applicant has not disclosed that the crossing over of the sutures provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the sutures not crossing each other in order to facilitated the entrance of the heart valve through the annulus and avoid harmful contact to the heart.

Therefore, it would have been an obvious matter of design choice to modify Carpentier et al reference to obtain the invention as specified in claim 1.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3738

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
